Chief O. H. Myhre, of the local fire church front being illuminated. Bruches were recovided amidst the mans for the installation of an electic fire alarm system in filter City.

The funds received from the insurance companies are available for such purpose and will likely be utilized—Independent.

The date of the insurance in the december of little children, accompanied by the organ, sung simple hymns in the orea air. Following that came the dreworks and last an address was made appropriate to the december of little children concluding at the little ones of his household yesterday night, and was noticed careesing the little ones of his household yesterday afternoon. Mr. Hubbelt states that the limits ones of his flocks will amount to

THE CENSUS.

Phiton Stares, while special agents, in addition to this army of employes, will make the count in Alaska and the Hawalian islands. Mr. Protorick Wines, assistant director of the census, was is the actual skilled and trained statistician in charge of the work, under Director Merriam, the political head of the census, recently

one-half hours a day, so that the loss great that they are for of one minute a day in the work of the 000 a year. This example is only one 1d and efficient work. Taking into account the saving of time and the increase in efficiency, a building costing \$150,000 would pay for tuelf in one year and in five years, or the duration of ne census, would save the government three-fourths of a million dollars." This is merely one of the illustrations lief of these women. The that may be given of the need of e permanent census bureau. Statistical ork is scientific and should obviously be committed to the care of an experisposed, trained force, rather than o raw recruits, whose slow, unintelligent and insecurate labors vitiate the results, which only reach the light about the time when the next census The advice of Mrs. Pink- is to appear. Carrott D. Wright, the teringulahed statistician, has said that he crude spotts system applied to the last census cost the government \$2,000 -200 more than would have been used by the intelligent application of business mation. While congress refused with mphasis to consider any plan for bringing the census employes under civil service rules of any sort, the heads of the census bureau have devised for all enumerators a simple test, which is calculated to prevent the absolutely toempetent from receiving appointtents. The test is the first step in a eform which those who have labored to have business methods introduced
